Do We Really Know China? Iris Efthymiou-Eggleton 2016-06-23 Different cultures and civilizations have different perception of a history context and ideas. The Greek philosophers Socrates, Plato, Demosthenes, Aristotle, etc. shaped Western thought, Western logic and built our thought systems. Nowadays we need historical pluralism and to form a cohesive whole, especially in an increasingly multipolar world. It is said that Western people, from a European philosophical perspective, are only capable of addressing alternate philosophies using our own mindset. China historically saw its civilization as self-evident universal and did not feel the need to justify this in European terms. Despite the difficulties in comparing different cultures and civilizations, this text summarizes the influence between China and the West, Chinas soft power as well as the current situation of China and its way up the global ladder of power. The concept of Chineseness and the identity with the Sinosphere, a brief presentation of Chinas history, geopolitical influences, and industrial aspects, the foundation of Chinese thought, language and writing system as well as technological achievements, traditional medicine, arts, and cuisine are only some of the topics covered in the next pages. In addition more subjects are analyzed that provide an overview of the current global position of China, the countrys efforts for reform and global influence as well as its future potentials. These subjects dont fall far from discussing various economic and industrial facts like the integration of Chinese and European renewable energy markets, the made in China phenomenon, foreign policy, and the countrys position as a rising aid donor. After reading this book, it should become obvious that China sees herself as Chung-Kuo; that means the Middle Kingdom, the centre of the universe, and the worlds oldest culture and society. So one could say that this is what they are trying to do so they can make their country again the centre of todays world. But during their rise, which they characterize as peaceful, they need to maintain global balance and escape from potential unpleasant events, for example one could think of an analogy of US-China relations and the Thucydides trap. Its seems so far that all the odds are with them, their soft power in combination with political strategies, their ability to evolve and

follow global trends in addition with a huge internal market brought China to its position today. But will China hold this place? Will the country rise to world's number one, and in China's way to global dominance, are we expected to see any more reforms? It seems that all these are in the hands of the Chinese.

Economics for Business John Sloman 2018-11 Good economic decision making is fundamental to the success of business Economic decisions lie at the heart of business. Economics is all about the choices between alternatives and how to weigh up their costs and benefits. Studying this book will help you understand such choices and how to make them successfully when you take up a job or perhaps run your own business. Businesses need to make choices of what and

how much to produce, what techniques to use, who to employ, what investment to make, where to locate, what markets to develop and how best to compete with rivals. Economics helps them make the right decisions. But making the right decisions depends on the economic environment in which businesses operate. For example, government policy affects business: whether through taxation, subsidies, training and education, regulation or trade policies. The economic environment is also affected by trade relations and the actions of international bodies such as the World Trade Organization (WTO) and the International Monetary Fund (IMF). Issues such as Brexit, trade deals and migration crucially affect businesses. The book shows you how. You will be studying all these issues and more in this book. It will give you the skills to advise businesses and other organisations on how best to achieve their objectives. The advice of economists is crucial to good decision making. But to give good advice requires understanding issues and assessing evidence. Studying economics helps to give you this understanding and makes you a better problem solver.

Japanese Understanding of Salvation Martin Heißwolf 2018-02-14 It is no secret that Christianity has been widely rejected in Japan with less than two percent of the population identifying as Christian. The dominant worldview in Japan is deeply animistic, with beliefs such as the Japanese mana-concept, ki (?), the Japanese soul-concept, and the concept of God/god(s), kami (?), being deeply rooted in the culture and fundamentally influencing society. Dr Martin Heißwolf, with his years of experience in Japan, critically examines Japanese animism in light of core Christian beliefs, such as the concepts of “peace” and “salvation.” Central to Japanese people’s rejection of Christian truth is the diametric opposition of its supernatural message to the natural focus of Japanese animistic folk religion. Heißwolf’s meticulous study is framed squarely within missiological thought and praxis so Christians serving in Japanese contexts are better able to communicate the message of the gospel by more fully understanding Japanese people, people by whom God wants to be known.
