The Pataphysician's Library Ben Fisher 2000-01-01 The Pataphysician's Library is a study of aspects of 1890s French literature, with specific reference to the traditions of Symbolism and Decadence. Its main focus is Alfred Jarry, who has proved, perhaps surprisingly, to be one of the more durable fin-de-siècle authors. The originality of this study lies in its use of the enigmatic list of books termed the livres pairs, which appears in Jarry's 1898 novel *Gestes et Opinions du docteur Faustroll, pataphysicien*, his best-known prose work. The greatest interest of the livres pairs lies in a group of works by Jarry's friends and contemporaries, primarily Leon Bloy, Georges Darien, Gustave Kahn, Catulle Mendès, Josephin Madan, Rachilde, and Henri de Regnier. Several of these authors feature as the lords of islands visited by the pataphysician Dr Faustroll in his curious voyage around Paris. In conjunction with Jarry's own works, the contemporary livres pairs serve to illustrate the vibrant and experimental atmosphere in which these authors worked.

Design Guidelines in American Cities John Punter 1999-02-01 This book is a study of design initiatives and policies in five US West Coast cities — Seattle (including Bellevue), Portland, San Francisco, Irvine and San Diego—all of which have had particularly interesting urban design experience of relevance to practice in Britain and other countries. Although these cities are not a representative sample of all American design practice, they provide a rich vein of ideas about recent policy development and current initiatives which will stimulate thought about the formulation of effective design controls. The presentation of substantial extracts from key documents that underpin design controls in the five cities will be of interest, inspiration and practical use to academics and practitioners who want to know more about American practice and who want to contribute to improvements in the standards and quality of urban design policies and design control. The opening chapter provides a national context and a comparative framework for the study, with a focus on international perspectives, American planning systems and the development of criteria for comparison and evaluation. The five subsequent chapters take each city in turn, briefly reviewing the salient characteristics of each one before presenting an account of how planning and design policy have evolved in the last twenty-five years; key features of the contemporary systems of design control are highlighted and a summary evaluation is made. The focus in the case studies is on how policy and guidance have been formulated, structured and presented in the various documents that make up the policy framework, how the process of control operates, and how both respond to the criticisms commonly made of design and control. This final chapter draws general conclusions about

the experience of the studied cities of wider relevance to American design review practice, but which are of interest to those engaged in design review and policy formulation everywhere. Housing and Home Unbound Nicole Cook 2016-05-05 Housing and Home Unbound pioneers understandings of housing and home as a meeting ground in which intensive practices, materials and meanings tangle with extensive economic, environmental and political worlds. Cutting across disciplines, the book opens up the conceptual and empirical study of housing and home by exploring the coproduction of the concrete and the abstract, the intimate and the institutional, the experiential and the collective. Exploring diverse examples in Australia and New Zealand, contributors address the interleaving of money and materials in the digital commodity of real estate, the neoliberal invention of housing as a liquid asset and source of welfare provision, and the bundling of car and home in housing markets. The more-than-human relations of housing and home are articulated through the role of suburban nature in the making of Australian modernity, the marketing of nature in waterfront urban renewal, the role of domestic territory in subversive social movements such as Seasteading and Tiny Houses, and the search for home comfort through low-cost energy efficiency practices. The transformative politics of housing and home are explored through the decolonizing of housing tenure, the shaping of housing policy by urban social movements, the lived importance of marginal spaces in Indigenous and other housing, and the affective lessons of the ruin. Beginning with the diverse elements gathered together in housing and home, the text opens up the complex realities and possibilities of human dwelling.

Design Out Crime Ian Colquhoun 2007-03-14 Here is a book about the practical design of communities and housing in which people can enjoy a good quality of life, free from crime and fear of crime. Recognising that crime, vandalism and anti-social behaviour are issues of high public concern, and that the driving forces behind crime are numerous, this book argues that good design can help tackle many of these issues. It shows how, through integrating simple crime prevention principles in the design process, it is possible, almost without notice, to make residential environments much safer. Written from the perspective of an architect and town planner, this book offers practical design guidelines through a set of accessible case studies drawn from the UK, USA, The Netherlands and Scandinavia. Each example illustrates how success comes when design solutions reflect local characteristics and where communities are truly sustainable; where residents feel they belong, and where crime is dealt with as part of the bigger picture of urban design.

Handbook of Urban Landscape Cliff Tandy 2013-10-22 Handbook of Urban Landscape deals with aspects most related to architecture while, at the same time, it aims to serve the landscape profession itself. Because the field of landscape work is so wide, the present handbook is limited to urban landscape. The handbook can be used at three levels. Its technical studies and reviews form a general guide to current thought on the design of various kinds of open space; its design guide and information sheets are a daily reference for the landscape design process; and through its sources and references, readers can obtain background information or more specific guidance on particular aspects. This handbook is intended as a desk-side guide for all designers of urban space, including architects, landscape architects, planners, and engineers—and for students of these professions. It should also help to improve understanding of the work and procedures of landscape architects, so that all who use them as consultants will be better equipped to brief them.

RETHINK Design Guide Nicola Gillen 2021-02-18 The world has changed. How will society emerge post-pandemic? Will we take the opportunity to reset the status quo? And, if so, what possibilities are there for architects to take the initiative in designing this new world? This innovative design guide draws together expert guidance on designing in the immediate aftermath of the pandemic for key architectural sectors: housing, workplace, civic and cultural, hospitality, education, infrastructure and civic placemaking. It provides design inspiration to architects on how they can respond to the challenges and opportunities of a post-pandemic environment and how architects ensure they are at the forefront of the best design in this new world. Looking at each sector in turn, it covers the challenges specific to each, and how delivering these designs might differ from the pre-pandemic world. As well as post-pandemic design, the vital issue of climate change will be threaded through each sector, with many cross-overs between designing for the climate emergency and designing for a world after a pandemic. Both seek to make the world a safer, happier and more resilient place. Written by set of contributing design experts, this book is for all architects, whether sole practitioners or working in a larger practice. As well as inspirational design guidance, it also provides client perspectives – crucial for understanding how clients are planning for the future too.
