I'm a Solicitor. Get Me Out of Here! Ray Fox 2015-08-20 Many years ago, when I first started my own company, I was reminded of a comment made by Benjamin Franklin. There were two aspects of life that no one could avoid - death and taxes. However, when you run a law firm, there's a third possibility that you can't avoid - at some time you're going to have to sell, merge or get your Practice valued. When I talk to Solicitors about succession planning, their eyes tend to glaze over and they generally take the view that as long as they bury their heads for long enough and deep enough in the sand, the problem will go away. The trouble is that these sorts of problems never go away. If anything, impending retirement looms larger and larger, especially as you get older. Most of the Solicitors that I talk to tell me that they're far too busy earning a living to spend time thinking about the future. As the old saying goes, sometimes you're just too busy bailing the boat out to be able to steer it. As another old saying goes, "if you don't know where you're going, you'll end up somewhere else." So where is your Practice going? Have you thought about where your Practice will be in 12 months, in 3 years, in 5 years time? What plans do you have in case you become ill and are unable to continue working? Do you have Solicitors within your firm who are thinking of leaving because they haven't been offered Salaried Partnership? Likewise, do you have Salaried Partners within your firm who are thinking of leaving because they haven't been offered Equity? What would happen if one of your key fee earners

became ill or left? If you are thinking of buying, selling merging or having your firm valued - this book is essential reading material.

Comparative Company Law Mathias Siems 2018-09-20 As attention moves rapidly towards comparative approaches, the research and teaching of company law has somehow lagged behind. The overall purpose of this book is therefore to fill a gap in the literature by identifying whether conceptual differences between countries exist. Rather than concentrate on whether the institutional structure of the corporation varies across jurisdictions, the objective of this book will be pursued by focusing on specific cases and how different countries might treat each of these cases. The book also has a public policy dimension, because the existence or absence of differences may lead to the question of whether formal harmonisation of company law is necessary. The book covers 12 legal systems from different legal traditions and from different parts of the world (though with a special emphasis on European countries). In alphabetical order, those countries are: Finland, France, Germany, Italy, Japan, Latvia, the Netherlands, Poland, South Africa, Spain, the UK, and the US. All of these jurisdictions are subjected to scrutiny by deploying a comparative case-based study. On the basis of these case solutions, various conclusions are reached, some of which challenge established orthodoxies in the field of comparative company law.
