Uncommon Core Michael W. Smith 2014-04-01 Leave instruction to the experts! Uncommon Core puts us on high-alert about some outright dangerous misunderstandings looming around so-called "standards-aligned" instruction, then shows us how to steer past them—all in service of meeting the real intent of the Common Core. It counters with teaching suggestions that are true to the research and true to our students, including how: Reader-based approaches can complement text-based ones Prereading activities can help students meet the strategic and conceptual demands of texts Strategy instruction can result in a careful and critical analysis of text while providing transferable understandings Inquiry units around essential questions can generate meaningful conversation and higher-order thinking

Terminal Identity Scott Bukatman 1993 Scott Bukatman's Terminal Identity—referring to both the site of the termination of the conventional "subject" and the birth of a new subjectivity constructed at the computer terminal or television screen--puts to rest any lingering doubts of the significance of science fiction in contemporary cultural studies. Demonstrating a comprehensive knowledge, both of the history of science fiction narrative from its earliest origins, and of cultural theory and philosophy, Bukatman redefines the nature of human identity in the Information Age. Drawing on a wide range of contemporary theories of the postmodern—including Fredric Jameson, Donna Haraway, and Jean Baudrillard—Bukatman begins with the proposition that Western culture is suffering a crisis brought on by advanced electronic technologies. Then in a series of chapters richly supported by analyses of literary texts, visual arts, film, video, television, comics, computer games, and graphics, Bukatman takes the reader on an odyssey that traces the postmodern subject from its current crisis, through its close encounters with technology, and finally to new self-recognition. This new "virtual subject," as Bukatman defines it, situates the human and the technological as coexistent, codependent, and mutually defining. Synthesizing the most provocative theories of postmodern culture with a truly encyclopedic treatment of the relevant media, this volume sets a new standard in the study of science fiction—a category that itself may be redefined in light of this work. Bukatman not only offers the most detailed map to date of the intellectual terrain of postmodern technology studies—he arrives at new frontiers, providing a propitious launching point for further inquiries into the relationship of electronic technology and culture.

Light Architecture Gianni Ranaulo 2001 The rapid development of Information Technology has also effected the layout and planning of our towns. Increasingly, physical structures are being covered with a veneer of visual-virtual light architecture which makes use of the new media to alter existing buildings and quarters, enriching and enhancing them. The townscape of tomorrow will become a huge, multilayered screen, which will draw the passers-by into an interactive electronic world. Gianni Ranaulo, born in 1957, is a practising architect, architectural critic and curator of exhibitions. He lives in France.

Coast of Dreams Kevin Starr 2011-06-22 In this extraordinary book, Kevin Starr—widely acknowledged as the premier historian of California, the scope of whose scholarship the Atlantic Monthly has called "breathtaking"—probes the possible collapse of the California dream in the years 1990—2003. In a series of compelling chapters, Coast of Dreams

moves through a variety of topics that show the California of the last decade, when the state was sometimes stumbling, sometimes humbled, but, more often, flourishing with its usual panache. From gang violence in Los Angeles to the spectacular rise—and equally spectacular fall—of Silicon Valley, from the Northridge earthquake to the recall of Governor Gray Davis, Starr ranges over myriad facts, anecdotes, news stories, personal impressions, and analyses to explore a time of unprecedented upheaval in California. *Coast of Dreams* describes an exceptional diversity of people, cultures, and values; an economy that mirrors the economic state of the nation; a battlefield where industry and the necessities of infrastructure collide with the inherent demands of a unique and stunning natural environment. It explores California politics (including Arnold Schwarzenegger's election in the 2003 recall), the multifaceted business landscape, and controversial icons such as O. J. Simpson. "Historians of the future," Starr writes, "will be able to see with more certainty whether or not the period 1990-2003 was not only the end of one California but the beginning of another"; in the meantime, he gives a picture of the place and time in a book at once sweeping and riveting in its details, deeply informed, engagingly personal, and altogether fascinating.

Lost and Found Bill Griffith 2012-01-30 Bill Griffith is best known as the creator of the *Zippy* daily comic strip, currently running in over 300 newspapers nationwide, but *Zippy* was conceived as an underground comix character before he became embraced in the mainstream. Beginning in 1969, Griffith contributed stories to a long list of legendary undergrounds. *Lost and Found* is not only a collection of these underground comix — hand-picked by the artist himself — but a mini-memoir of the artist's comix career during the early days of the San Francisco Underground and his nearly twenty year on-again, off-again involvement with Hollywood and TV. This collection from one of the great, pioneering cartoonists also features Griffith's comics for *High Times*, *The National Lampoon*, *The San Francisco Examiner* and *The New Yorker*.

Visible Cities, Global Comics Benjamin Fraser 2019-10-15 More and more people are noticing links between urban geography and the spaces within the layout of panels on the comics page. Benjamin Fraser explores the representation of the city in a range of comics from across the globe. Comics address the city as an idea, a historical fact, a social construction, a material-built environment, a shared space forged from the collective imagination, or as a social arena navigated according to personal desire. Accordingly, Fraser brings insights from urban theory to bear on specific comics. The works selected comprise a variety of international, alternative, and independent small-press comics artists, from engravings and early comics to single-panel work, graphic novels, manga, and trading cards, by artists such as Will Eisner, Tsutomu Nihei, Hariton Pushwagner, Julie Doucet, Frans Masereel, and Chris Ware. In the first monograph on this subject, Fraser touches on many themes of modern urban life: activism, alienation, consumerism, flânerie, gentrification, the mystery story, science fiction, sexual orientation, and working-class labor. He leads readers to images of such cities as Barcelona, Buenos Aires, London, Lyon, Madrid, Montevideo, Montreal, New York, Oslo, Paris, São Paulo, and Tokyo. Through close readings, each chapter introduces readers to specific comics artists and works and investigates a range of topics related to the medium's spatial form, stylistic variation, and cultural prominence. Mainly, Fraser mixes interest in urbanism and architecture with the creative strategies that comics artists employ to bring their urban images to life.

Jewish Bible Translations Leonard Greenspoon 2020-11 *Jewish Bible Translations* is the first book to examine Jewish Bible translations from the third century BCE to our day. It is an overdue corrective of an important story that has been regularly omitted or downgraded in other histories of Bible translation. Examining a wide range of translations over twenty-four centuries, Leonard Greenspoon delves into the historical, cultural, linguistic, and religious contexts of versions in eleven languages: Arabic, Aramaic, English, French, German, Greek, Hungarian, Italian, Russian, Spanish, and Yiddish. He profiles many Jewish translators, among them Buber, Hirsch, Kaplan, Leeser, Luzzatto, Mendelssohn,

Orlinsky, and Saadia Gaon, framing their aspirations within the Jewish and larger milieus in which they worked. Greenspoon differentiates their principles, styles, and techniques--for example, their choice to emphasize either literal reflections of the Hebrew or distinctive elements of the vernacular language--and their underlying rationales. As he highlights distinctive features of Jewish Bible translations, he offers new insights regarding their shared characteristics and their limits. Additionally, Greenspoon shows how profoundly Jewish translators and interpreters influenced the style and diction of the King James Bible. Accessible and authoritative for all from beginners to scholars, Jewish Bible Translations enables readers to make their own informed evaluations of individual translations and to holistically assess Bible translation within Judaism.

Images of Class Jacopo Galimberti 2022-09-06 The first overview of the unique encounter between artists and the prominent Marxist current Workerism, also known as Operaismo. During the 1960s and 1970s, Workerism and Autonomia were prominent Marxist currents. However, it is rarely acknowledged that these movements inspired many visual artists such as the members of Archizoom, Gordon Matta-Clark and Gianfranco Baruchello. This book focuses on the aesthetic and cultural discourse developed by three generations of militants (including Mario Tronti, Antonio Negri, Bifo and Silvia Federici), and how it was appropriated by artists, architects, graphic designers and architectural historians such as Manfredo Tafuri. Images of Class signposts key moments of this dialogue, ranging from the drawings published on *classe operaia* to *Potere Operaio's* exhibition in Paris, the Metropolitan Indians' zines, a feminist art collective who adhered to the Wages for Housework Campaign, and the N group's experiments with Gestalt theory. Featuring more than 140 images of artworks, many published here for the first time, this volume provides an original perspective on post-war Italian culture and new insights into some of the most influential Marxist movements of the twentieth and twenty-first centuries worldwide.

Fact and Fiction John Hollowell 2017-11-01 Journalists and novelists responded to the pervasive social changes of the 1960s in America with a variety of experiments in nonfiction. Those who have praised the vitality of the new journalism have seen it as a fusion of the journalist's passion for detail and the novelist's moral vision. Hollowell presents a critically sharp portrait of what the new journalists and novelists are doing and why. The author concludes that future writing will further obscure the difference between fact and fiction. Originally published in 1977. A UNC Press Enduring Edition -- UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print. Storming Heaven Jay Stevens 1987 *Storming Heaven* is a riveting history of LSD and its influence on American culture. Jay Stevens uses the "curious molecule" known as LSD as a kind of tracer bullet, illuminating one of postwar America's most improbable shadow-histories. His prodigiously researched narrative moves from Aldous Huxley's earnest attempts to "open the doors of perception" to Timothy Leary's surreal experiments at Millbrook; from the CIA's purchase of millions of doses to the thousands of flower children who turned on and burned out in Haight-Ashbury. Along the way, this brilliant, novelistic work of cultural history unites such figures as Allen Ginsberg, Cary Grant, G. Gordon Liddy, and Charles Manson. *Storming Heaven* irrefutably demonstrates LSD's pivotal role in the countercultural upheavals that shook America in the 1960s and changed the country forever.

Hearts of the City Herbert Muschamp 2013-12-11 From the late Herbert Muschamp, the former architecture critic of The New York Times and one of the most outspoken and influential voices in architectural criticism, a collection of his best work. The pieces here—from The New Republic, Artforum, and The New York Times—reveal how Muschamp's views were both ahead of their time and timeless. He often wrote about how the right architecture could be inspiring and uplifting, and he uniquely drew on film, literature, and popular culture to write pieces that were passionate and often personal, changing the landscape of architectural criticism in the process. These columns made architecture a subject accessible to everyone at a moment when, because of the heated debate between modernists and postmodernists, architecture had become part of a larger public dialogue. One of the most courageous and engaged voices in his field, he devoted many columns at the Times to the lack of serious new architecture in this country, and particularly in New York, and spoke out against the agenda of developers. He departed from the usual dry, didactic style of much architectural writing to playfully, for example, compare Frank Gehry's Guggenheim Bilbao to the body of Marilyn Monroe or to wax poetic about a new design for Manhattan's manhole covers. One sees in this collection that Muschamp championed early on the work of Frank Gehry, Rem Koolhaas, Zaha Hadid, Thom Payne, Frank Israel, Jean Nouvel, and Santiago Calatrava, among others, and was drawn to the theoretical writings of such architects as Peter Eisenman. Published here for the first time is the uncut version of his brilliant and poignant essay about gay culture and Edward Durrell Stone's museum at 2 Columbus Circle. Fragments from the book he left unfinished, whose title we took for this collection—"A Dozen Years," "Metroscope," and "Atomic Secrets"—are also included. Hearts of the City is dazzling writing from a humanistic thinker whose work changed forever the way we think about our cities—and the buildings in them.

American Judaism in Popular Culture Philip M. and Ethel Klutznick Chair in Jewish Civilization. Symposium 2006 The series Studies in Jewish Civilization, based on the annual symposium of the Klutznick Chair in Jewish Civilization and Harris Center for Judaic Studies, examines Jewish history and culture around the world and throughout history. Volume 17 includes fourteen essays that provide an overview of Jews and Judaism in American popular culture. Relevant discussions of music, film, television, literature, cartoons, sports, and material culture inform our current understanding of the influence that Jewish culture has in modern American society. Taken together, these essays make a strong case that appropriate analysis of popular culture is essential for a proper understanding of something as multifaceted and varied as American Judaism and the American Jewish community. The essays recognize, even if they cannot precisely define, something distinctly "Jewish" and distinctively "American" in each of the individuals and groups featured in this collection.

Beat Drama Deborah Geis 2016-07-28 Readers and acolytes of the vital early 1950s-mid 1960s writers known as the Beat Generation tend to be familiar with the prose and poetry by the seminal authors of this period: Jack Kerouac, Gregory Corso, Lawrence Ferlinghetti, Diane Di Prima, and many others. Yet all of these authors, as well as other less well-known Beat figures, also wrote plays—and these, together with their countercultural approaches to what could or should happen in the theatre—shaped the dramatic experiments of the playwrights who came after them, from Sam Shepard to Maria Irene Fornes, to the many vanguard performance artists of the seventies. This volume, the first of its kind, gathers essays about the exciting work in drama and performance by and about the Beat Generation, ranging from the well-known Beat figures such as Kerouac, Ginsberg and Burroughs, to the "Afro-Beats" - LeRoi Jones (Amiri Baraka), Bob Kaufman, and others. It offers original studies of the women Beats - Di Prima, Bunny Lang - as well as groups like the Living Theater who in this era first challenged the literal and physical boundaries of the performance space itself.

Radical Evolution Joel Garreau 2005-05-17 In Radical Evolution, bestselling author Joel Garreau, a reporter and editor for the Washington Post, shows us that we are at an inflection point in history. As you read this, we are engineering the next stage of human evolution. Through advances in genetic, robotic, information and nanotechnologies, we are altering our minds, our memories, our metabolisms, our personalities, our progeny—and perhaps our very souls. Taking us behind the scenes with today's foremost researchers

and pioneers, Garreau reveals that the super powers of our comic-book heroes already exist, or are in development in hospitals, labs, and research facilities around the country -- from the revved up reflexes and speed of Spider-Man and Superman, to the enhanced mental acuity and memory capabilities of an advanced species. Over the next fifteen years, Garreau makes clear, these enhancements will become part of our everyday lives. Where will they lead us? To heaven--where technology's promise to make us smarter, vanquish illness and extend our lives is the answer to our prayers? Or will they lead us, as some argue, to hell -- where unrestrained technology brings about the ultimate destruction of our entire species? With the help and insights of the gifted thinkers and scientists who are making what has previously been thought of as science fiction a reality, Garreau explores how these developments, in our lifetime, will affect everything from the way we date to the way we work, from how we think and act to how we fall in love. It is a book about what our world is becoming today, not fifty years out. As Garreau cautions, it is only by anticipating the future that we can hope to shape it.

Featuring interviews with those within his inner circle, this exploration reveals the bestselling author of *One Flew Over the Cuckoo's Nest* in his many forms, placing him within the framework of his time, his generation, and the zeitgeist of the psychedelic era.

Mumbai Fables Gyan Prakash 2010-10-10 A place of spectacle and ruin, Mumbai exemplifies the cosmopolitan metropolis. It is not just a big city but also a soaring vision of modern urban life. Millions from India and beyond, of different ethnicities, languages, and religions, have washed up on its shores, bringing with them their desires and ambitions. *Mumbai Fables* explores the mythic inner life of this legendary city as seen by its inhabitants, journalists, planners, writers, artists, filmmakers, and political activists. In this remarkable cultural history of one of the world's most important urban centers, Gyan Prakash unearths the stories behind its fabulous history, viewing Mumbai through its turning points and kaleidoscopic ideas, comic book heroes, and famous scandals--the history behind Mumbai's stories of opportunity and oppression, of fabulous wealth and grinding poverty, of cosmopolitan desires and nativist energies. Starting from the catastrophic floods and terrorist attacks of recent years, Prakash reaches back to the sixteenth-century Portuguese conquest to reveal the stories behind Mumbai's historic journey. Examining Mumbai's role as a symbol of opportunity and reinvention, he looks at its nineteenth-century development under British rule and its twentieth-century emergence as a fabled city on the sea. Different layers of urban experience come to light as he recounts the narratives of the Nanavati murder trial and the rise and fall of the tabloid *Blitz*, and Mumbai's transformation from the red city of trade unions and communists into the saffron city of Hindu nationalist Shiv Sena. Starry-eyed planners and elite visionaries, cynical leaders and violent politicians of the street, land sharks and underworld dons jostle with ordinary citizens and poor immigrants as the city copes with the dashed dreams of postcolonial urban life and lurches into the seductions of globalization. Shedding light on the city's past and present, *Mumbai Fables* offers an unparalleled look at this extraordinary metropolis.

X Films Alex Cox 2008-06-30 Philip French has called Alex Cox, 'British Cinema's oldest enfant terrible'; it's a description that its recipient fully approves of. He is the genuine article, a radical, international, independent filmmaker, who is also a good writer, insightful commentator on cinema now, and expert critic of the power of Hollywood. He grew up with a passion for the pictures, and this book has as its centre the filmmaking autobiography of a fine director, the journey through all the major films he has made and how he has made them, including his new film, now in production. He takes us to varied locations, including the US, Mexico, and Nicaragua, where he made "Walker" with the cooperation of the Sandinista government. His book is full of fresh ideas, rare insights into many films of all kinds and into the people he's worked with including greats like Dennis Potter and Harry Dean Stanton. As well as being the confessions of a radical filmmaker, "X Films" is also the most readable working manual yet for the independent filmmaker. Enfant terrible he may be, but Alex Cox is also ahead of the game and is a pioneer and promoter of new forms of filmmaking for the cultural revolutionaries of the 21st century - visual, visceral but interactive, with multiple narrative possibilities.

Harry Dean Stanton Joseph B. Atkins 2020-11-12 Harry Dean Stanton (1926--2017) got his start in Hollywood in TV productions such as *Zane Grey Theater* and *Gunsmoke*. After a series of minor parts in forgettable westerns, he gradually began to get film roles that showcased his laid-back acting style, appearing in *Cool Hand Luke* (1967), *Kelly's Heroes* (1970), *The Godfather: Part II* (1974), and *Alien* (1979). He became a headliner in the eighties -- starring in Wim Wenders's *Paris, Texas* (1984) and Alex Cox's *Repo Man* (1984) -- but it was his extraordinary skill as a character actor that established him as a revered cult figure and kept him in demand throughout his career. Joseph B. Atkins unwinds Stanton's enigmatic persona in the first biography of the man *Vanity Fair* memorialized as "the philosopher poet of character acting." He sheds light on Stanton's early life in West Irvine, Kentucky, exploring his difficult relationship with his Baptist parents, his service in the Navy, and the events that inspired him to drop out of college and pursue acting. Atkins also chronicles Stanton's early years in California, describing how he honed his craft at the renowned Pasadena Playhouse before breaking into television and movies. In addition to examining the actor's acclaimed body of work, Atkins also explores Harry Dean Stanton as a Hollywood legend, following his years rooming with Jack Nicholson, partying with David Crosby and Mama Cass, jogging with Bob Dylan, and playing poker with John Huston. "HD Stanton" was scratched onto the wall of a jail cell in

Easy Rider (1969) and painted on an exterior concrete wall in Drive, He Said (1971). Critic Roger Ebert so admired the actor that he suggested the "Stanton-Walsh Rule," which states that "no movie featuring either Harry Dean Stanton or M. Emmet Walsh in a supporting role can be altogether bad." Harry Dean Stanton is often remembered for his crowd-pleasing roles in movies like Pretty in Pink (1986) or Escape from New York (1981), but this impassioned biography illuminates the entirety of his incredible sixty-year career. Drawing on interviews with the actor's friends, family, and colleagues, this much-needed book offers an unprecedented look at a beloved figure.
