Spon's Architects' and Builders' Price Book 2018 AECOM 2017-09-22 Construction prices rose over the last year by 5%, according to AECOM's tender price index, with construction price inflation continuing to run above the long-run average.

The main drivers are rising input costs. Producer price indices have moved up at a clip in recent quarters, with sharp increases in prices for materials and fuels consumed by UK manufacturers. Demand- and supply-side factors make the probability of short-term price falls very slim. SPON'S ARCHITECTS' AND BUILDERS' PRICE BOOK 2018, compiled by AECOM, still provides the most accurate, detailed and professionally relevant construction price information for the UK. Its unique Tender Index, updated through the year, gives an ongoing reality check and allows you to adjust for changing market conditions. Although it suits a wide range of project sizes, this is the only price book which sets out a detailed cost base for contracts exceeding £4,000,000 in value. Use the access code inside the front cover of the book to get set up with a VitalSource® ebook of this 2018 edition. This versatile and powerful online data viewing package is available for use until the end of December 2018. Major changes have been made to this 143rd edition: New Cost Models for a retail distribution unit, a palliative care unit, and a cinema As well as an overhaul of prices, several new items have been added, including: An expanded range of beam & block flooring Rainwater harvesting – with a precast concrete tank A precast concrete flow attenuation system Precast concrete communication boxes ... along with the standard features you have come to expect from SPON'S ARCHITECTS' AND BUILDERS' PRICE BOOK: 20,000 prices for the most frequently specified items, the majority with labour constants and detailed build-ups. Hundreds of alternative materials prices for the more unusual items. Detailed guidance on wage rates, daywork, cost limits and allowances, property insurance and professional fees, plus useful formulae, design criteria and trade association addresses. Handbook of EU Competition Law Walter Frenz 2016-01-15 This handbook offers detailed descriptions of EU competition law, including mergers and public authorities. Above all, it analyzes and discusses recent decisions of the ECJ and the General Court. Presenting systematically structured and theoretically founded content, the book also includes recommendations for practitioners. Special attention is paid to the scope of penalties and the influence on fundamental rights. Rounding out the book, the conflict between safeguarding confidential information and the effectiveness of private and public enforcement is discussed intensively in the context of the new Directive 2014/104/EU.

Spon's Architects' and Builders' Price Book 2022 AECOM 2021-09-23 A range of factors are all combining to propel input cost inflation. Higher international logistics costs, returning demand from industry workload, and higher global metals prices are some of the ingredients to quicker building cost inflation. Whilst some EU materials exporters to the UK are adjusting to Brexit, other EU exporters — initially smaller or specialist firms hit proportionally harder — are now deciding not to supply the UK at all, because the additional red tape involved makes it not commercially viable. If this trend replicates across the whole EU to UK supply chain, visible disruption and higher prices are likely until other sources of supply begin to increase in volume and step in to address these supply issues. Among other exporters continuing to supply the UK, significant price increases are being applied to cover the permanent Brexit non-tariff barriers and additional administrative processes. SPON'S ARCHITECTS' AND BUILDERS' PRICE BOOK 2022, compiled by AECOM, still provides the most accurate, detailed and professionally relevant construction price information for the UK. Its unique Tender Index, updated through the year (2015 = 100), gives an ongoing reality check and allows you to adjust for changing market conditions. ICT Law Book Adam J. Mambi 2010 Recent developments in Information and Communication Technologies (ICT) have brought about changes that have revolutionised traditional ways of conducting business. While these developments in cyberspace bear legal implications, legal regimes in some African countries such as Tanzania have not kept pace with the changes in order to properly regulate related activities happening under cyberspace. This volume attempts to bridge the gap between the Law and ICT developments in East Africa. It attempts to respond to questions such as: What is Cyber Law? How are Parties Identified under a Relationship in a Cyberspace Environment? How are Banking and other Cyber

Payments Done? What about Combating Cyber Crime and Managing E-Commerce? What is the Impact of ICT on Intellectual Property Rights? And, how are Internet Domain Names Regulated? The volume is a useful handbook for those who want to understand the changing legal guidelines in relation to developments in ICT.

Spon's Architect's and Builders' Price Book 2016 AECOM 2018-10-09 Strong output demand over the last year has stretched the industry. The issues are being felt by all firms across the delivery chain – from clients to subcontractors. Capacity constraints almost always manifest themselves in prices. Increased tender prices have become the primary symptom of these supply-side issues. The main driver of new work output growth over the last 18 months is slowing. Both the public and private housing sectors are quickly reversing all of their recent upward trends when looked at on a yearly growth basis. The counterpoint to this is that the yearly growth figures are still positive, meaning that new work continues to flow. SPON'S ARCHITECTS' AND BUILDERS' PRICE BOOK 2016, compiled by AECOM, still provides the most accurate, detailed and professionally relevant construction price information for the UK. Its unique Tender Index, updated through the year, gives an ongoing reality check and allows you to adjust for changing market conditions. On Treason Carlton F. W. Larson 2020-09-29 A concise, accessible, and engaging guide to the law of treason, written by the nation's foremost expert on the subject The only crime defined in the United States Constitution, treason is routinely described by judges as more heinous than murder. Today the term is regularly thrown around by lawmakers and pundits on both sides of the aisle. But as these heated accusations flood the news cycle, it's not always clear what the crime of treason truly is, or when it should be prosecuted. Drawing on over two decades of research, constitutional law and legal history scholar Carlton Larson takes us on a grand tour of the Treason Clause of the United States Constitution. Despite the Clause's apparent simplicity, Larson demonstrates that it is a form of constitutional quicksand in which seemingly obvious intuitions are often far off the mark. From the floors of the medieval British Parliament that codified the Statute of Treasons upon which the American law was based to the treason of Benedict Arnold, our nation's founding traitor, to more recent events, including WWII's "Tokyo Rose" and the allegations against Edward Snowden and Donald Trump, Larson provides a riveting account of treason law in action. **On Treason** is an indispensable guide for anyone who wants to understand this fundamental aspect of our legal system. With this short, accessible look at the law's history and meaning, Larson clarifies who is actually guilty--and readers won't need a law degree to understand why.
